

Dear Parent/Guardian,

Our school is using Lexia Strategies™, a web-based reading program that provides the targeted practice and instruction students need to develop their reading skills.

As an added benefit, students can use Strategies at home. Getting started is easy!

1. Launch a web browser and go to [www.lexiastrategies.com](http://www.lexiastrategies.com).
  - Create a bookmark or favourite for this web address.
  - You will see a link to download Adobe Flash Player if you do not have it. Flash Player 11 or higher is required.
  - If you have a slow Internet connection or if you cannot install Flash Player, you can install the strategies software on your computer instead of using the website. Go to [www.lexialearning.com](http://www.lexialearning.com) and click **Downloads** at the top of the page. Choose Lexia Strategies. Find UK Downloads.  
**Note: you will need a customer ID code for log in:** \_\_\_\_\_
  - iPad and iPad Mini users can download the Lexia Strategies app from the App store. Search for "Lexia Strategies UK".
  - Android tablet users can download the Strategies app from the Google Play store. Search for "Lexia Strategies UK". Note: the app is not available for Kindle.
2. The first time you access Lexia Strategies, you must set up:
  - Click the Student/Parent button.
  - Type in your teacher's email (below) and click the arrow button to continue.
3. Allow or help your child to login. The student username and password (below) is the same login they use at school.

**Teacher Email (for setup)** \_\_\_\_\_

**Student Username** \_\_\_\_\_

**Student Password** \_\_\_\_\_

**Important!** Please allow your child to work independently at his or her own pace. Provide encouragement, but don't give away the answers!

4. Please try to ensure an average of 20-30 minutes per session. We recommend that usage be kept to a reasonable level – not too short and not too long.

Need more help getting started? Go to [www.lexialearning.com](http://www.lexialearning.com) and click **Support**.

Sincerely,

\_\_\_\_\_
