

Whitelisting, Firewall, Proxies, Content Filtering -- Allow Access

LexiaUK[®]

If your school uses proxy servers, Lexia Core5 & Lexia Strategies will use the OS-configured proxy server settings.

Does your network use Firewalls, Proxies, or Content Filtering?

If your network uses a firewall to control web traffic or content filtering, your network administrator must allow Lexia Reading software to access to the following URLs:

- **Prevention:** Lexia identifies those at the highest risk of reading failure.
- **Intervention:** a systematic, personalised approach to essential reading skills.
- **SPaG:** how Lexia covers common spelling and grammar rules.
- **Progressing the more able:** exposing pupils to more academic vocabulary and developing advanced comprehension skills.
